

Evaluation and Appraisal Report

Since the adoption of the LCI Study, Clarkston has accomplished a number of recommendations of the Study.

1. Prepared and Adopted Comprehensive Development Plan
2. Prepared and Adopted Zoning Ordinance that allows for implementation of the LCI Study as well as allows the development of smaller lot size developments and mixed use projects that are transit friendly
3. Developed Design Guidelines for the City
4. Prepared a Master Plan for Friendship Forest
5. Solicited HPP funding from Congresswoman Cynthia McKinney using LCI short term work program and received \$4,000,000.00 grant. These funds are being used to pay for streetscape improvements and other transportation related projects
6. Developed concept plans for the replacement of the pool and bath house at Milam Park. This pool was condemned by the County in 2008.
7. Received \$500,000.00 CDBG funding to replace pool and bath house.

The biggest barrier Clarkston has to overcome is the lack of funding and the current economic conditions. The City is working with the County to provide matching funds for streetscape improvements. Several developers have explored opportunities to redevelop the downtown area; however, high land prices and multiple ownership has been a barrier in this endeavor.

The LCI plan recommendations have been followed and there are no actions that have occurred that are contrary to the LCI plan recommendations . One new development started in early 2008. An 18 lot subdivision that had been approved prior to the LCI Study has been started. Grading has been completed and the road, storm water management facility and underground utilities have been installed and two houses have been partially constructed. The 2 houses are for sale but no other work is occurring.

A land use map was created during the preparation of the Zoning Ordinance and is included herein. No transportation projects have happened other than the streetscape projects outlined in the attached template.

The Implementation Plan with updated 5-Year Action Plan

The Mayor and 6 person City Council are the body that will ensure the action items are implemented. The City collaborate with DeKalb County to help with the required matching funds and working with GDOT during the project approval process.

Clarkston is committed to improving the quality of life for their citizens. It is a very pedestrian oriented community and the City is improving the pedestrian circulation system. The City is reaching out to the

development community to partner with them in the redevelopment of the downtown area and working with local property owners to ensure their property conforms to zoning and development standards.
